Montana Career Information System (MCIS)  
Self-Assessment

USERNAME: rmcollege
PASSWORD: Battlinbears1

Making good career decisions involves identifying jobs at the intersection of occupations and your personal interests, values, skills, and abilities. MCIS can help you find this “sweet spot” when you complete these assessments (not tests!) to learn more about who you really are. MCIS won’t tell you what to be when you grow up, but it will generate options you may not have considered.

To use MCIS:
The MCIS system is available at www.mtcis.intocareers.org. The initial user name and password is above. Next set up a portfolio with a user name and password of your choosing to save assessment results. To do this, click on Create My Portfolio and follow the instructions for New Users. Save all your assessments in your “portfolio” in MCIS so you can easily refer to the results when you meet with a career counselor. Portfolio password must be at least 6 characters (including one non-alphabetical character), with no spaces. Record your login info here, you’ll need it (and not the ‘rmcollege’ information) the next time you want to use this system:

username__________________ password________________________

Assessments & Profiles

Occupations Sort: (Found under the Occupations tab, then click on the + in the What occupations match my preferences? area) Designed to identify what you know about yourself, and your likes and dislikes, Occupations Sort creates a list of occupations that match your preferences. It doesn't tell you what you should be. Instead, Occupation Sort locates occupations that match factors you regard as important.

Interest Profiler: (Found under the Assessments tab, then click on the + in the What are my interests? area) Find out what your interests are and how they relate to the world of work. Your Interest Profiler scores will help you identify your strongest work-related interests to help you decide what kinds of jobs and careers you want to explore.

SKILLS: (Found under the Assessments tab, then click on the + in the What skills and work values are important to me? area) Helps you identify occupations that use the skills you find satisfying and also helps you recognize skills that transfer between occupations. SKILLS lists the Top 30 occupations that best match your skills, and calculates a Holland Personality Type based on your skills.

Work Importance Locator: (Found under the Assessments tab, then click on the + in the What skills and work values are important to me? area) Learn more about work values that are important to you in a job as you rank different aspects of work that represent 20 important work values. Knowing your work values can help you decide what kinds of jobs and careers you might want to explore.

Other Resources

Occupation overview: Read an in-depth description of almost any occupation or career that you can name – aspects such as an overview, working conditions, preparation, wages & demand.

“Reality Check” shows you how much money you need to earn after graduation and which occupations will pay your expenses.
